- SQL
- Version Control (Git)

Education

The Software Guild- Web Development

1000 hour full-stack web programming bootcamp top of my class, focusing on computer science principles and object oriented programming with respect to web engineering and open source technologies.

SUNY Stony Brook-
Political Science

Apprentice

The Software Guild

2019–2020

- Used Object Oriented programming to create a CRUD DVD Library app that stored DVDs by name and ID.
- Built a Flooring Web App with an online ordering system using the MVC design concept that keeps track of all internal orders for flooring supply company, including taxes and products available for and suited for different projects.
- Worked with a team to create a RESTful API SuperHero Sightings Web App using AGILE practices that used Thymeleaf and SQL.
- Wrote a Full Stack Blog Site with security in mind that only allowed some users to edit certain posts and has an ability to add and remove users. Integrated external TinyMC to allow for more seamless blog posting. Users could create their own static pages for the site. Posts were categorized and used hashtags as a feature for user convenience.

Social Media & Office Manager

Manhattan Skin and Laser Center

2018–2020

- Managed all platforms of social media, including Facebook, Instagram, and Twitter and increased following by 300%.
- Improved upon business strategies and client relations - led to an overall increase in revenues by 20%.
- Designed full-scale digital marketing campaigns and hired social media influencers for online marketing campaigns.

English Teacher

Avanguardie Trekking, Puglia, Italy

2017-2018

- Taught English conversations skills to a partially bilingual family as a cultural exchange and translated business documents and descriptions of natural specimens on trekking expeditions into Italian.
- Started and managed social media platforms to increase visibility in emerging market.

Office Manager

Mega Insurance Brokerage

2015–2017

- Managed operations for an office of 5 employees and managed over 500 with insurance claims including insurance and liabilities claims for NYC TLC, including all office IT and Technical Support for TLC, insurance claims software, and Windows PC's.
- Detailed spreadsheeting, records analysis and bookkeeping for office expenditures and revenue and implemented changes that led to an overall 50% increase in total business and revenues.
